

Electronic Signatures for Energy

Only a few work environments are as competitive as the energy market. Understandably, you want to stand out from the rest.

- Increase sales & streamline the sale process
- Prevent contract losses & gain control
- Build & maintain your green image

You can make that change with electronic signatures. Learn here [how eSignatures have been changing the game.](#)

You can use electronic signatures for:

- Energy contracts
- Supplier contracts
- Vendor contracts
- HR documents
- Your climate policy

How do eSignatures help?

Streamline Workflows

Cut down on your own and your customers time. Through the use of eSignatures you will no longer have to wait for the mail to arrive. Contracts are send directly to your customers mailbox!

Expand Your Green Image

Most energy companies offer green energy and climate change is a hot topic. So why not expend your green initiatives to more area's of your company and take a step towards a paperless office.

Increase Sales

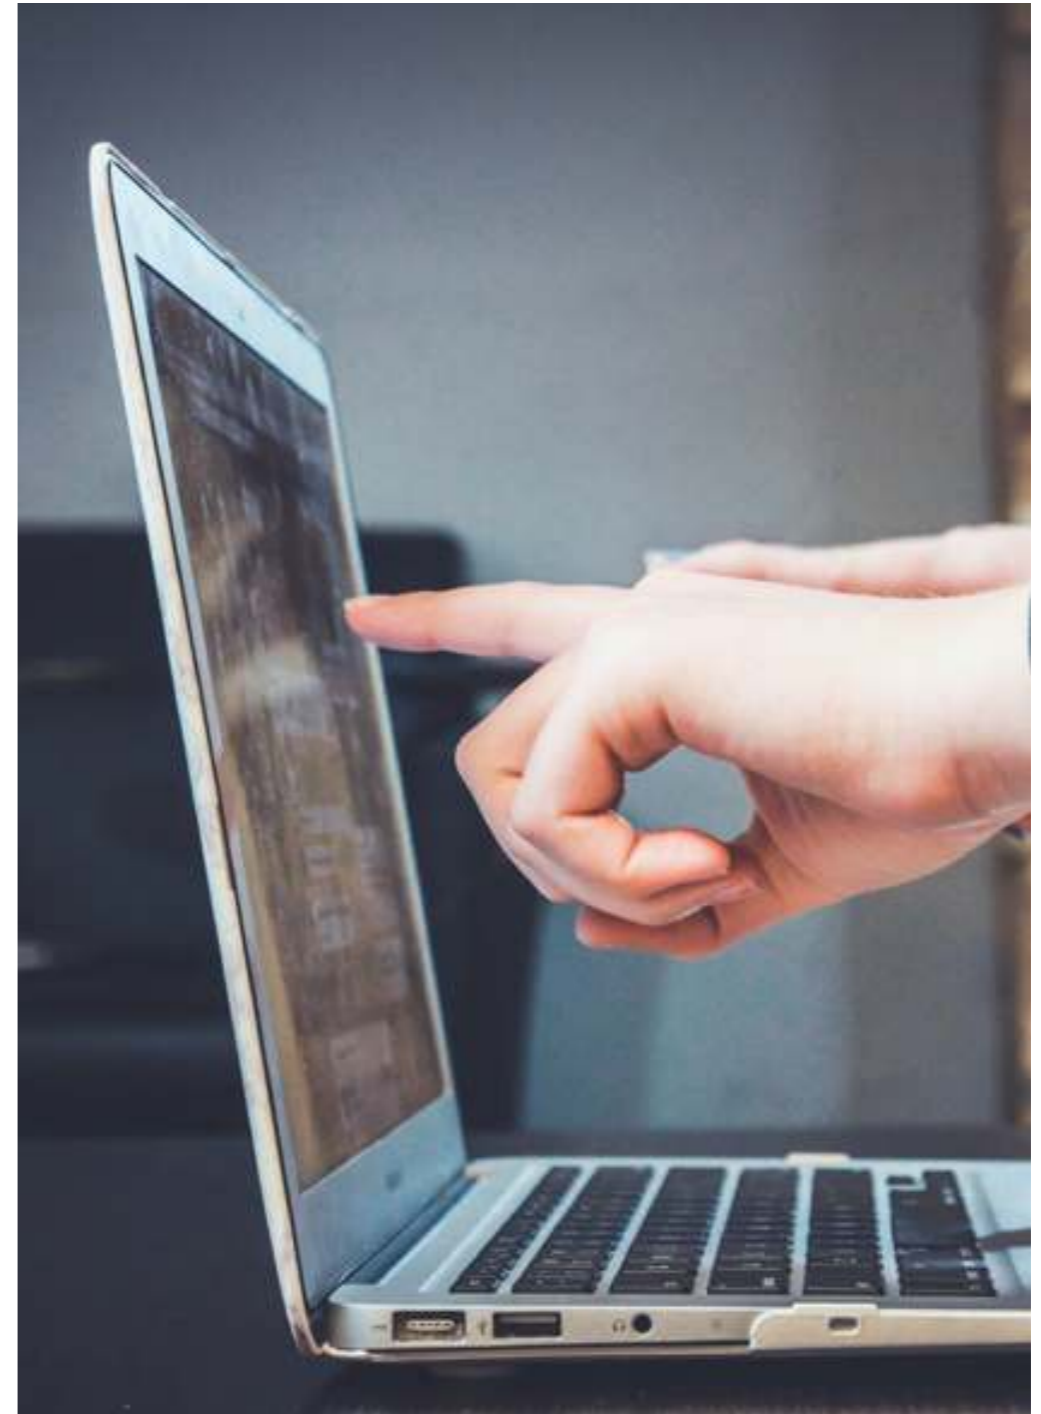

Whether your sales are from a door-to-door salesman, compare websites or from the telemarketers, make sure you never lose a contract ever again by making them electronic and saved in the cloud.

Gain Control

See at any moment of the day which contracts have been sent out, who has signed already and who still has to sign. Signable offers automated reminders to make sure your contracts get signed ASAP.

Integration with CRM

Integrate Signable with your CRM for a seamless experience to further simplify the signing process. Our API is free to use for all of our plans. We will give you all the documentation for you to hit the ground running.
